## **An Introduction to Tropical Food Science** Hans Gerd Muller

This introduction to tropical food science addresses the needs of two groups of people. First, there are those living in the tropics who require a simple introductory text. Food science is perhaps the most important science affecting their lives. The second group consists of students, administrators, and workers in industry and research in temperate zones, who are concerned with food problems but who have no firsthand knowledge of the tropics. The text provides a concise and accessible guide to all the major elements of the subject, including the nutritional value of tropical foodstuffs, its digestion, and the preparation and preservation of food. The author has taken care to avoid the use of jargon and the text is supplemented by many useful and explanatory illustrations.
