Nightfall's Day: What if Time Isn't Time? Lyn Murray

Reviews: "If I'd had a history teacher like this - I would have made straight A's!" * * * "I've never before read an author like this. Love the way she mixes fact with fiction, history with storytelling. Awesome!" * * *

Preface Nightfall's Day is a study in (and of) TIME, combining fact filled discussions and fascinating stories that are based upon truths you may or may not be aware of. We all assume that time is the same everywhere – when that couldn't be further from the truth! Time is not a constant, and changes when speed/acceleration is part of the equation. For instance – if you live in a two story house, time is marginally (but measurably) slower upstairs than it is downstairs. What if scientists have discovered ways to create time anomalies within Earth's gravitational field that can alter time, change the fabric of time, and maneuver time to facilitate some hidden agenda? What if – we're caught in the middle of this technology, and only realize it when we stumble into and are trapped in a time anomaly. Could this be one explanation for DejaVu? What are you going to do? Die?! Or – perhaps find yourself lost between dimensions – forever. Fantasy? Maybe not – as you'll discover when reading about the electromagnetic warfare involving HAARP – that's going on now, behind our backs, right before our sheeple eyes!
