Energy for the 21st Century: Opportunities and Challenges for Liquefied Natural Gas (LNG) (New Horizons in Environmental and Energy Law series) Susan L. Sakmar

'Professor Sakmar's book is a must read for anyone interested in gaining a better understanding of the most dynamic segment of the global energy industry.'

- Jay Copan, Executive Director, LNG 17

With clear and direct text, supplemented with key maps, charts and graphics from government, industry and other sources, the book moves the reader smoothly through the early history of LNG up to current developments, including shale gas and North American LNG exports. The book is a valuable resource for anyone interested in understanding global gas markets and the energy policy challenges facing us in the 21st century.'

- Jacqueline L. Weaver, A.A. White Professor of Law, University of Houston Law Center, US

Countries around the world are increasingly looking to liquefied natural gas (LNG) - natural gas that has been cooled until it forms a transportable liquid - to meet growing energy demand. Energy for the 21st Century provides critical insights into the opportunities and challenges LNG faces, including its potential role in a carbon-constrained world.

This comprehensive study covers topics such as the LNG value chain, the historical background and evolution of global LNG markets, trading and contracts, and an analysis of the various legal, policy, safety and environmental issues pertaining to this important fuel. Additionally, the author discusses emerging issues and technologies that may impact global LNG markets, such as the development of shale gas, the prospects of North American LNG exports, the potential role of the Gas Exporting Countries Forum and floating LNG. The author contextualizes the discussion about the importance of LNG with an analysis of why the 21st century will be the 'golden age' of natural gas.

Accessible and non-technical in nature, this timely book will serve as an essential reference for practitioners, scholars and anyone else interested in 21st century energy solutions.
