Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering)

Irving P. Herman

Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) Irving P. Herman

This book comprehensively addresses the physics and engineering aspects of human physiology by using and building on first-year college physics and mathematics. Topics include the mechanics of the static body and the body in motion, the mechanical properties of the body, muscles in the body, the energetics of body metabolism, fluid flow in the cardiovascular and respiratory systems, the acoustics of sound waves in speaking and hearing, vision and the optics of the eye, the electrical properties of the body, and the basic engineering principles of feedback and control in regulating all aspects of function. The goal of this text is to clearly explain the physics issues concerning the human body, in part by developing and then using simple and subsequently more refined models of the macrophysics of the human body. Many chapters include a brief review of the underlying physics. There are problems at the end of each chapter; solutions to selected problems are also provided. This second edition enhances the treatments of the physics of motion, sports, and diseases and disorders, and integrates discussions of these topics as they appear throughout the book. Also, it briefly addresses physical measurements of and in the body, and offers a broader selection of problems, which, as in the first edition, are geared to a range of student levels. This text is geared to undergraduates interested in physics, medical applications of physics, quantitative physiology, medicine, and biomedical engineering.

From reader reviews:

Madelyn McDowell:

Now a day individuals who Living in the era where everything reachable by connect with the internet and the resources inside it can be true or not need people to be aware of each details they get. How many people to be smart in having any information nowadays? Of course the correct answer is reading a book. Looking at a book can help persons out of this uncertainty Information especially this Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) book because this book offers you rich info and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it as you know.

Marylou Standley:

Playing with family in a very park, coming to see the sea world or hanging out with close friends is thing that usually you may have done when you have spare time, subsequently why you don't try thing that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering), you could enjoy both. It is great combination right, you still need to miss it? What kind of hang type is it? Oh can happen its mind hangout men. What? Still don't have it, oh come on its identified as reading friends.

Carey Gilliam:

Beside this particular Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) in your phone, it could give you a way to get nearer to the new knowledge or facts. The information and the knowledge you will got here is fresh from your oven so don't always be worry if you feel like an previous people live in narrow commune. It is good thing to have Physics of the Human Body (Biological and Medical Physics, Biomedical Engineering) because this book offers to you personally readable information. Do you oftentimes have book but you don't get what it's interesting features of. Oh come on, that wil happen if you have this with your hand. The Enjoyable blend here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss this? Find this book along with read it from right now!

Vanessa Kistler:

What is your hobby? Have you heard that will question when you got college students? We believe that that concern was given by teacher to their students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person such as reading or as reading become their hobby. You need to know that reading is very important and book as to be the thing. Book is important thing to add you knowledge, except your current teacher or lecturer. You find good news or update concerning something by book. Amount types of books that can you go onto be your object. One of them is this Physics of the Human Body

(Biological and Medical Physics, Biomedical Engineering).
