Biological control of piercing sucking pests.: parasitoids and Predators Ahmed Amin Ahmed Saleh

Field experiments were carried out to evaluate the role of parasitoids and predators against some sucking pests. Predators and parasitoids are promising biological control agents against piercing sucking pests, and it is recommended to consider the releasing time of predators and parasitoids in Egyptian fields in any IPM program designed for the control of piercing sucking pests in Egypt in order to decrease the environmental pollution by the traditional heavy and repeated use of insecticides.
