Junior Environmental Activities on File (Junior Science Resources on File) Victoria Chapman

On File "TM" is our award-winning collection of visual reference materials. Each On File "TM" depicts complex subjects in a way that both engages and informs students and researchers. These flexible resources fit into every curriculum.-- Instructors can use the pages for handouts, overheads, posters, and testing.-- Students can use them as quick sources of information, to reference curriculum topics, or to supplement their essays and reports.-- On Files "TM" are available in either binder or electronic format.-- All of the maps, charts, diagrams, and illustrations are designed in clean black-and-white graphics and are printed on sturdy pages.-- Pages are housed in durable three-ring binders.-- Replacement pages are available if they are lost or stolen.

Nature Brought to Life, One Step at a Time

Junior Environmental Activities On File "TM" gives librarians, educators, and students a reference book of activities that illustrates and illuminates ecological knowledge and environmental studies. It offers step-by-step instructions to more than ninety engaging exercises ranging from hands-on projects, worksheets, and paper-and-pencil work to outdoor activities and games.

A Variety of Formats & Topics

Each activity allows students to interact with the natural world and encourages scientific reasoning by asking students to: -- Observe and Measure-- Compare and Classify-- Sample and Survey -- specially designed activities called Small-Area-Science make the big job of collecting data on the environment manageable by showing students how to sample small parts of a larger area-- Model and Experiment -- for example, rates of decomposition are determined by having students create compost-- Communicate -- through student-created charts, diagrams, art, written work, and reports.

In addition, the activities come with both safety and environmental precautions in order to ensure a safe, productive learning experience.
