Problem Snake Management: The Habu and the Brown Treesnake (Comstock books)

Problem Snake Management: The Habu and the Brown Treesnake (Comstock books)

Intensive research on and management of poisonous snakes has centered on Japan, home of the Habu, and Guam, where Brown Treesnakes have killed off many native species. This book draws on that research to present comprehensive guidelines for snake management, offering a wealth of information on their biology and behavior previously unavailable in English.

The authors address a wide range of problems associated with snakes, from bites to wildlife endangerment. They cover basic biology and ecology; management techniques such as detection, capture, and habitat modification; use of predators, parasites, and toxicants; and methods of isolating snakes with electrical, chemical, or habitat barriers. All management recommendations are based on the latest ecological, behavioral, and sensory information. The importance of natural history in formulating management programs for snakes is emphasized.
