Correlations of Soil and Rock Properties in Geotechnical Engineering (Developments in Geotechnical Engineering)

Jay Ameratunga, Nagaratnam Sivakugan, Braja M. Das

Correlations of Soil and Rock Properties in Geotechnical Engineering (Developments in Geotechnical Engineering) Jay Ameratunga, Nagaratnam Sivakugan, Braja M. Das

This book presents a one-stop reference to the empirical correlations used extensively in geotechnical engineering. Empirical correlations play a key role in geotechnical engineering designs and analysis. Laboratory and in situ testing of soils can add significant cost to a civil engineering project. By using appropriate empirical correlations, it is possible to derive many design parameters, thus limiting our reliance on these soil tests. The authors have decades of experience in geotechnical engineering, as professional engineers or researchers. The objective of this book is to present a critical evaluation of a wide range of empirical correlations reported in the literature, along with typical values of soil parameters, in the light of their experience and knowledge. This book will be a one-stop-shop for the practising professionals, geotechnical researchers and academics looking for specific correlations for estimating certain geotechnical parameters. The empirical correlations in the forms of equations and charts and typical values are collated from extensive literature review, and from the authors' database.

From reader reviews:

Jamie Arellano:

Why don't make it to be your habit? Right now, try to prepare your time to do the important work, like looking for your favorite e-book and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the book entitled Correlations of Soil and Rock Properties in Geotechnical Engineering (Developments in Geotechnical Engineering). Try to face the book Correlations of Soil and Rock Properties in Geotechnical Engineering (Developments in Geotechnical Engineering) as your close friend. It means that it can to be your friend when you sense alone and beside that of course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you a lot more confidence because you can know anything by the book. So , let's make new experience as well as knowledge with this book.

Marie Heidelberg:

In this period globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The particular book that recommended to you is Correlations of Soil and Rock Properties in Geotechnical Engineering (Developments in Geotechnical Engineering) this book consist a lot of the information of the condition of this world now. This specific book was represented so why is the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The particular writer made some exploration when he makes this book. That is why this book suitable all of you.

Michael Jones:

That publication can make you to feel relax. This book Correlations of Soil and Rock Properties in Geotechnical Engineering (Developments in Geotechnical Engineering) was bright colored and of course has pictures on the website. As we know that book Correlations of Soil and Rock Properties in Geotechnical Engineering (Developments in Geotechnical Engineering) has many kinds or category. Start from kids until teens. For example Naruto or Detective Conan you can read and feel that you are the character on there. So , not at all of book are usually make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading which.

Theresa Frost:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from your book. Book is composed or printed or outlined from each source in which filled update of news. With this modern era like at this point, many ways to get information are available for you actually. From

media social including newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the Correlations of Soil and Rock Properties in Geotechnical Engineering (Developments in Geotechnical Engineering) when you essential it?
