Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) Sebastian Thrun

Lifelong learning addresses situations in which a learner faces a series of different learning tasks providing the opportunity for synergy among them. Explanation-based neural network learning (EBNN) is a machine learning algorithm that transfers knowledge across multiple learning tasks. When faced with a new learning task, EBNN exploits domain knowledge accumulated in previous learning tasks to guide generalization in the new one. As a result, EBNN generalizes more accurately from less data than comparable methods.

Explanation-Based Neural Network Learning: A Lifelong Learning Approach describes the basic EBNN paradigm and investigates it in the context of supervised learning, reinforcement learning, robotics, and chess.

'The paradigm of lifelong learning - using earlier learned knowledge to improve subsequent learning - is a promising direction for a new generation of machine learning algorithms. Given the need for more accurate learning methods, it is difficult to imagine a future for machine learning that does not include this paradigm.'
From the Foreword by Tom M. Mitchell.

From reader reviews:

Michael Hamlin:

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite reserve and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science). Try to stumble through book Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) as your buddy. It means that it can being your friend when you sense alone and beside those of course make you smarter than ever before. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know every little thing by the book. So , we need to make new experience along with knowledge with this book.

Alicia Gentry:

Exactly why? Because this Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will zap you with the secret the item inside. Reading this book alongside it was fantastic author who also write the book in such awesome way makes the content on the inside easier to understand, entertaining means but still convey the meaning fully. So , it is good for you for not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of positive aspects than the other book get such as help improving your skill and your critical thinking way. So , still want to hesitate having that book? If I ended up you I will go to the publication store hurriedly.

Michael Green:

Beside this kind of Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) in your phone, it could possibly give you a way to get closer to the new knowledge or data. The information and the knowledge you will got here is fresh from the oven so don't be worry if you feel like an old people live in narrow village. It is good thing to have Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) because this book offers to your account readable information. Do you sometimes have book but you would not get what it's about. Oh come on, that will not end up to happen if you have this in your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. Use you still want to miss it? Find this book and read it from now!

Anthony Martin:

Reserve is one of source of know-how. We can add our knowledge from it. Not only for students but native or citizen need book to know the up-date information of year to be able to year. As we know those

publications have many advantages. Beside many of us add our knowledge, can bring us to around the world. Through the book Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science) we can acquire more advantage. Don't you to definitely be creative people? For being creative person must like to read a book. Just choose the best book that appropriate with your aim. Don't become doubt to change your life at this time book Explanation-Based Neural Network Learning: A Lifelong Learning Approach (The Springer International Series in Engineering and Computer Science). You can more inviting than now.
