Data Modeling Master Class Training Manual 6th Edition: Steve Hoberman's Best Practices Approach to Developing a Competency in Data Modeling Steve Hoberman

This is the sixth edition of the training manual for the Data Modeling Master Class that Steve Hoberman teaches onsite and through public classes. This text can be purchased prior to attending the Master Class, the latest course schedule and detailed description can be found on Steve Hoberman's website, stevehoberman.com.

The Master Class is a complete data modeling course, containing three days of practical techniques for producing conceptual, logical, and physical relational and dimensional and NoSQL data models. After learning the styles and steps in capturing and modeling requirements, you will apply a **best practices approach** to building and validating data models through the Data Model Scorecard. You will know not just how to build a data model, but how to build a data model *well*. Two case studies and many exercises reinforce the material and will enable you to apply these techniques in your current projects.

Top 10 Objectives:

1. Explain data modeling components and identify them on your projects by following a question-driven approach
2. Demonstrate reading a data model of any size and complexity with the same confidence as reading a book
3. Validate any data model with key "settings" (scope, abstraction, timeframe, function, and format) as well as through the Data Model Scorecard
4. Apply requirements elicitation techniques including interviewing, artifact analysis, prototyping, and job shadowing
5. Build relational and dimensional conceptual and logical data models, and know the tradeoffs on the physical side for both RDBMS and NoSQL solutions
6. Practice finding structural soundness issues and standards violations
7. Recognize when to use abstraction and where patterns and industry data models can give us a great head start
8. Use a series of templates for capturing and validating requirements, and for data profiling
9. Evaluate definitions for clarity, completeness, and correctness
10. Leverage the Data Vault and enterprise data model for a successful enterprise architecture.

From reader reviews:

Jack Michaud:

The event that you get from Data Modeling Master Class Training Manual 6th Edition: Steve Hoberman's Best Practices Approach to Developing a Competency in Data Modeling is a more deep you looking the information that hide into the words the more you get considering reading it. It doesn't mean that this book is hard to be aware of but Data Modeling Master Class Training Manual 6th Edition: Steve Hoberman's Best Practices Approach to Developing a Competency in Data Modeling giving you joy feeling of reading. The author conveys their point in specific way that can be understood by anyone who read it because the author of this book is well-known enough. That book also makes your personal vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having that Data Modeling Master Class Training Manual 6th Edition: Steve Hoberman's Best Practices Approach to Developing a Competency in Data Modeling instantly.

Peggy Mitchum:

Reading a book can be one of a lot of exercise that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a e-book will give you a lot of new data. When you read a publication you will get new information because book is one of various ways to share the information or even their idea. Second, reading a book will make you actually more imaginative. When you looking at a book especially hype book the author will bring that you imagine the story how the characters do it anything. Third, you could share your knowledge to other folks. When you read this Data Modeling Master Class Training Manual 6th Edition: Steve Hoberman's Best Practices Approach to Developing a Competency in Data Modeling, it is possible to tells your family, friends as well as soon about yours publication. Your knowledge can inspire others, make them reading a book.

Ronald Johnson:

Can you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try and pick one book that you find out the inside because don't assess book by its deal with may doesn't work is difficult job because you are afraid that the inside maybe not while fantastic as in the outside look likes. Maybe you answer might be Data Modeling Master Class Training Manual 6th Edition: Steve Hoberman's Best Practices Approach to Developing a Competency in Data Modeling why because the amazing cover that make you consider concerning the content will not disappoint you actually. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly assist you to pick up this book.

Frances Drury:

With this era which is the greater person or who has ability to do something more are more valuable than other. Do you want to become among it? It is just simple approach to have that. What you should do is just spending your time almost no but quite enough to enjoy a look at some books. On the list of books in the top

checklist in your reading list is actually Data Modeling Master Class Training Manual 6th Edition: Steve Hoberman's Best Practices Approach to Developing a Competency in Data Modeling. This book which can be qualified as The Hungry Slopes can get you closer in becoming precious person. By looking way up and review this reserve you can get many advantages.
